Pros2Plan Helps Pet Food Processor/Manufacturer Company Background

Pros2Plan provides staffing for one of the world's largest Pet Food Companies. The company produces, distributes, and markets branded pet food and pet snacks. The Pet Food Company is part of a roughly \$8 billion dollar global organization.

How Pros2Plan Helped

After being acquired, our client needed immediate assistance across the organization. They were transitioning to be a standalone organization within a short period of time. Our team provided staffing to allow our client to execute critical initiatives and integrations that put their business ahead of the competition.

The client not only needed to stand alone, but also needed to standardize and integrate their ERP System across all their businesses, as well as, standardize and optimize their Supply Chain (Advanced Planning System) across the enterprise.

By outsourcing key staffing gaps, the client had the flexibility to attack strategic initiatives and immediate projects, while continuing normal business activities and maintaining full-time staffing levels.

Pros2Plan provided resources with years of relevant experience coupled with industry background, specifically in the Demand Planning arena. This depth of expertise allowed the client to navigate the complexities of the integration, separation, and roll-outs, knowing that they had key resources to help manage the change, the day-to-day activities of the business and achieve the vision.

Pros2Plan's involvement included various gaps/projects across the years:

- **Functional Demand Planning Subject Matter Expert(s)** – Consultant to assist them through separation, integration and eventually further acquisitions
- **Subject Matter Expert** – Assisted in strategy, separation, implementations and roll-outs of Demand Planning
- **Full Time Hires** – Demand Planning Experts
- **Demand Planning Resources**
 - Immediate Backfills/Gap
 - Day-to-Day Demand Planning
- **Excel Specialists** – Write new reports to manage business
- **Planning Analysts**

We have assisted our clients in hundreds of engagements over the years.

Whether you need an extra set of hands for an implementation, upgrade, business process, or gap in a project, Pros2Plan can assist with providing consultants to ensure your success. With over 20 years of recruitment experience, we know how to find the hidden talent that is not found on job boards. The success stories of our clients and of our consultants are our best reference and we want to become one of your success stories.
